

## **Project Team – Meeting Minutes 1**

Date: 12/02/2026

Time: 15:00

Location: Virtual (Microsoft Teams)

Meeting Type: Project Review Meeting

Present: Yeaw Chu Lee (Client), Group10

### **Meeting Purpose**

To review all work completed to date, gather client feedback, and define next steps for progressing the prototype toward a final version.

### **Discussion Summary**

#### **1. Review of Completed Work**

- Team presented a consolidated overview of all work completed so far, including research, prototype development, and preliminary data handling processes.
- Demonstrations were provided to show current functionality and progress achieved since the previous milestone.

#### **2. Client Review and Feedback**

- Client (Yeaw Chu Lee) reviewed the presented work in detail.
- Feedback was given on the technical direction and overall structure of the prototype.
- Client confirmed that the project was aligned with the intended objectives and learning outcomes.

#### **3. Prototype to Final Version Planning**

- Discussion focused on how the current prototype can be refined into a final implementation.
- Key improvements identified:
  - Increased stability of the data pipeline.
  - Improved usability and clarity of outputs.
  - Clear definition of remaining development tasks.

#### **4. Next Steps Definition**

- Agreement reached on a structured plan for transitioning from prototype stage to final version.
- Responsibilities were outlined for refining features and improving data integration methods.

### **New Items**

- Refine and stabilise the existing prototype.
- Implement client feedback into the next development iteration.
- Prepare documentation outlining changes toward the final version.

### **Items for Next Meeting**

1. Present updated prototype with applied client feedback.
2. Demonstrate progress toward final implementation goals.

3. Review any technical challenges encountered.
