

Project Team – Meeting Minutes

Date: 02/20/2026

Time: 15:00

Location: In person

Meeting Type: Knowledge Transfer Meeting

Present: Previous Project Group Members, Current Project Team Members

Meeting Purpose

To meet with the previous group who worked on the project, exchange information, and discuss access to the full wind turbine dataset.

Discussion Summary

1. Project Handover and Information Sharing

- Previous group provided an overview of their work completed on the project.
- Technical methods, challenges, and lessons learned were discussed.
- Key design and data-handling decisions were explained to ensure continuity.

2. Dataset Expansion Discussion

- Previous group shared details of a larger wind turbine dataset collected during their phase of the project.
- Discussion focused on how this dataset could be transferred and accessed by the current group.
- The importance of working with the full-scale dataset to understand the complete scope of wind turbine data was highlighted.

3. Data Accessibility Planning

- Team began exploring options for sharing the full-sized dataset with the current group.
- Constraints related to file size, storage limits, and compatibility were discussed.
- Agreement reached to investigate suitable transfer methods before the next meeting.

New Items

- Evaluate methods for transferring and storing the full wind turbine dataset.
- Review dataset structure and documentation provided by the previous group.
- Identify technical requirements for handling the larger dataset.

Items for Next Meeting

1. Confirm chosen data transfer approach.
2. Verify dataset accessibility for all group members.
3. Begin integration of the expanded dataset into the project workflow.

Next Meeting

Date: 26/02/2026

Location: Virtual (Microsoft Teams)
